

ABSTRACT

The Delaware Department of Transportation (DelDOT) proposes to undertake a rehabilitation of Bridge 88, which carries Snuff Mill Road (Road 244) over Burris Run, a tributary of Red Clay Creek, in Christiana Hundred, New Castle County, Delaware. At the request of DelDOT, The Louis Berger Group, Inc. (Berger), conducted architectural investigations as part of the preliminary planning for the proposed rehabilitation. The purpose of the survey was to identify architectural resources within the area of potential effect that are currently listed in or eligible for listing in the National Register of Historic Places.

The architectural survey identified one architectural resource more than 50 years old located within the area of potential effect, the Brown-Garrett House (Shadowbrook Estate Gatehouse; N-1133). Supplementary Delaware Cultural Resource Survey documentation was compiled for this previously inventoried resource. The study also evaluated the National Register eligibility of the Brown-Garrett House and found it eligible under Criterion C.
